

AESTHETIC SPA SERVICES

DERMAPLANING

What is Dermaplaning? Dermaplaning is a form of manual exfoliation similar in theory to microdermabrasion but without the use of suction or abrasive crystals. An esthetician grade, sterile blade is stroked along the skin at an angle to gently "shave off" dead skin cells from the epidermis. Dermaplaning also temporarily removes the fine vellus hair of the face, leaving a very smooth surface. As with any type of exfoliation, the removal of dead skin cells allows home care products to be more effective, reduces the appearance of fine lines, evens skin tone and assists in reducing milia, closed and open comedones, and minor breakouts associated with congested pores. Dermaplaning can be an effective exfoliation method for clients that have couperose (tiny blood vessels near the surface of the skin), sensitive skin or allergies that prevent the use of microdermabrasion or chemical peels. Due to the contours of the face, certain areas of the face (such as the eyelids and nose) are not treatable using this method.

FACIALS

SPA FACIAL – ENJOY 50 MINUTES OF PURE RELAXATION AND PAMPERING. YOUR SKIN WILL GLOW AND YOUR BODY WILL THANK YOU.

- Professional Skin Analysis
- Cleansing Facial Massage
- Steam and Warm Towels
- Exfoliating Skin Treatment
- Customized Mask
- Customized Serums
- Massage of face, neck, shoulders, arms and hands
- Extractions (if needed)
- Aromatherapy and Guided Relaxation
- Moisture Treatments based on skin type

GLYCOLIC CHARCOAL PEEL

THE GLYCOLIC CHARCOAL PEEL IS A DETOXIFYING ACID PEEL WITH 25% GLYCOLIC ACID, PLUS 5% LACTIC ACID, ACTIVATED COCONUT CHARCOAL AND WILLOWHERB. PERFECT FOR THE MOST RESISTIVE SKIN THAT NEEDS A HIGHER ACTIVITY TO SEE RESULTS.

WHAT IT DOES

Recommended for clients with rough-textured skin, chronic blackheads/whiteheads, enlarged pores, excessive milia and deep congestion, dull skin, poor elasticity, excessive lines, and hyperpigmentation. Its acid hybrid works microscopically to dissolve surface cells and leave the skin glowing instead of flaking. Features activated Coconut Charcoal to detoxify and draw out aging environmental impurities.

WHAT ELSE YOU NEED TO KNOW

Clients may experience a warm and tingling sensation with this treatment.

MICRODERMABRASION

THE DIAMONDTOME™ SKIN RESURFACING TREATMENT IS NON-INVASIVE, PAIN-FREE AND REQUIRES NO DOWN TIME. TO ACHIEVE MAXIMUM RESULTS, SEVERAL TREATMENTS ARE RECOMMENDED FOR A HEALTHIER, YOUNGER LOOKING SKIN.

Microdermabrasion is a non-chemical, non-invasive procedure that uses a spray of microcrystals to remove the outermost layer of dry, dead skin cells and reveal younger, healthier-looking skin. Microdermabrasion also encourages the production of a new underlying layer of skin cells with higher levels of collagen and elastin, which further improves your skin's appearance. Microdermabrasion is much gentler than dermabrasion. Dermabrasion is a more intensive procedure used to treat deeper facial lines, extreme sun damage, and scars.

WAXING

WAXING SERVICE – ENJOY SMOOTH, HAIR FREE SKIN STARTING TODAY!

Have you ever heard that nasty rumor that if you wax your face it will grow back thicker and fuller? IT'S NOT TRUE! Here are the facts that will excite you and make you want to schedule a facial wax immediately. Enjoy smooth, hair free skin starting now.

There are two types of hair that grow on our bodies. Vellus (tiny translucent blonde hair) and Terminal (thicker hair that grows under the arms, pubic area, eye brows, mustache and beard for men, and legs).

It is physiologically impossible for your vellus hairs to grow back thicker.

Vellus hair, when cut or removed, will grow back the same. The structure of the hair does not become damaged, therefore it is impossible to alter. Terminal hair is physiologically coarse. When Terminal hair is cut, it grows back the same way, coarse.

Sometimes, waxing can make the hair appear to be "thinner" but it is really not thinner at all. Because waxing pulls the hair from its roots, the new hair grows in with a smooth tip, making it feel softer. But it is actually the same type of hair it was before. It's only when we cut hair (any type of hair) that the hair grows back with a blunt cut at the tip.

EAR CANDLING

Ear Cone Candles are a safe and effective way to clear ear canals of wax build-up. Cone candles are used to clean ears and are believed to help with various ear disorders. These cone candles are sometimes referred to as ear candles and are believed to have originated in ancient Egypt. Because of the success of this technique it spread to Greece and China and is now practiced through-out the world. Candling is the process in which the candle is lit and used to create a gentle vacuum. This can dislodge wax or debris and pull it into the candle.
